Attn: Environmental Affairs

Reference: AB-2588 AIR TOXICS INVENTORY REPORT

Please refer to your Air Toxics Inventory Plan (ATIP) which was approved by the South Coast Air Quality Management District. As required by the AB-2588 regulation, you have 180 days to submit an Air Toxics Inventory Report (ATIR) to the District from the date of the ATIP approval letter. We understand that your report is not due yet.

However, we need a preliminary estimate on facility-wide emissions of toxic substances. Please fill out and mail the enclosed Facility Emission Summary Form (PRELIMINARY). We are assuming that you have already started working on the report. Include summary of emissions that you have already estimated.

Please note that the final completed Facility Emission Summary Form must be submitted with the Air Toxics Inventory Report.

If you have any questions please call me at 818 572-6253.

Very truly yours,

Hernando Cordoba
A.Q. Engineer

I M P O R T A N T N O T I C E

Dear Sir or Madam:

State Assembly Bill 2588 requires operators of facilities which emit specific air toxics to prepare and submit, for review and approval, an Air Toxics Inventory Plan (ATIP) to the South Coast Air Quality Management District. In June 1989, we sent you a letter notifying you of these requirements and the August 1, 1989 deadline.

Our records indicate that you have not submitted the required Air Toxics Inventory Plan.

The enclosed Subchapter 7.6 Emission Inventory Criteria and Guidelines document contains the regulation and a workshop package which outlines a step by step procedure to prepare an inventory plan for your facility. Also, enclosed is an example of a completed inventory plan. These materials are provided to assist you in preparing the plan.

Failure to submit an Air Toxics Inventory Plan is a violation of Health and Safety Code Section 44340. If you are not subject to AB2588, please call the appropriate AQMD personnel on the following page to remove your name from our actions list.

The District will issue Notices of Violation to facilities subject to the AB2588 requirements that do not submit a plan by July 31, 1990.
